

**REMARKS****PRIORITY**

The specification has been amended to reflect the fact that the present application is the result of an RCE submitted in U.S. application no. 10/786,886, the parent application of which issued as U.S. Patent No. 6,713,481.

**STATUS OF CLAIMS**

Claims 8, 11 and 14 had been allowed. Claims 1-7, 9, 10, 12 and 13 had been canceled without prejudice. Claim 8 is herein amended. Claims 11 and 14 were previously presented. New Claims 15-22 are herein added. Support for this amendment and the new claims can be found in the specification.

**AMENDMENT**

Claim 8 is herein amended to recite each of the individual elements in the alternative, rather than collectively, in claiming crystalline polymorph Form I.

**NEW CLAIMS**

Claims 14-22 are herein added to claim crystalline polymorph Forms II and III.

**CONCLUSION**

It is believed that the foregoing amendments place this application in condition for allowance. Therefore, favorable action allowing pending Claims 8, 11, and 14-22 is respectfully solicited.

**AUTHORIZATION**

As this Amendment is being filed along with a timely filed RCE, no late fees are believed due at this time. However, if any extensions of time become necessary for the entry of this Amendment, the Commissioner is petitioned for such extensions. Similarly, if any fees other than those explicitly enumerated herein become necessary for the entry of this Amendment, the Commissioner is authorized to charge such fees to the Applicant's deposit account no. 19-0365.
